

Desalination Technology

Projects and Studies done or in execution

Client/Location	Project	Services	Year
LANXESS	Membrane Test in Egypt	Test of RO modules in a seawater desalination plant under operating conditions	2014
Confidential	Comparison of Membrane Technology	Comparison for a number of technical membrane components globally produced and used	2014
DME e.V. Germany	Desalination Roadmap	Development and project management of the <i>Global Desalination Roadmap</i> focusing on future desalination technologies in the world till 2045	2014
DME e.V. Germany	Desalination WIKI	Development of a <i>Desal Wiki</i> available via the internet	2014
KFW/Lahmeyer/ SONED (Germany / Tunisia)	Consulting Services Tunisia	Coupling of desalination and energy systems for a program of 6 desalination systems for water supply improvement in southern Tunisia	2013
DME e.V. Germany	Conceptual Study	Report e-learning concept	2013
Technical University Münich (TUM)	Competition for students: “More Water made out of Salty Water”	Jury Member	2013
BMBF (Federal Ministry of Education and Research)	Assessor of Project applications	Evaluation of project applications of a federal research and development program	2013
BMBF (Federal Ministry of Education and Research)	Assessor of Project applications	Evaluation of project applications of a federal research and development program	2012

Client/Location	Project	Services	Year
Confidential Germany	Strategic Consultancy	Membrane Recycling	2012
Fischer Eco Solutions	Market Development	Re-Powering of existing MSF and MED plants with new heat exchange systems	2012
Bilfinger und Berger	Strategic Consultancy	Evaluation and presentation of the desalination markets in respect of the implication to the company profile	2012
ThyssenKrupp	Strategic Consultancy	Evaluation and presentation of the desalination markets in respect of the implication of stainless steel.	2012
MEDESA	Strategic Consultancy	Data collection, market research and technical comparison	2012
ENEC (Emirates Nuclear Energy Company) (UAE) United Arabian Emirates	Strategic Consultancy	Strategic techno and economic study on water desalination	2012
HCM Cyprus	Consultancy services	10 MWel parabolic trough solar thermal power plant. Evaluation of the overall efficiencies, the plant's flow sheet and the initial CAPEX estimation.	2011
KA-CARE Kingdom of Saudi Arabia	Subject Matter Expert Renewable Energy (CSP, PV, Waste) and Desalination Consultancy services	Building up the new organization, it's role and obligations for the Kingdom of Saudi Arabia being the expert for CSP, PV, waste and desalination plants all over the Saudi Kingdom.	2011
King Abdulaziz Univ. Kingdom of Saudi Arabia	Technical Advisor	Consulting researchers and scientists of King Abdulaziz Univ. for Desalination Technology powered by renewable energy	2011

Client/Location	Project	Services	Year
KBA Germany	Expert Consultancy	Evaluation of companies and their technologies for KBA	2011
BMBF (Federal Ministry of Education and Research)	Assessor of Project applications	Evaluation of project applications of a federal research and development program	2011
KFW/Lahmeyer/ SONED (Germany / Tunisia)	Consulting Services Tunisia	Coupling of desalination and energy systems for a program of 6 desalination systems for water supply improvement in southern Tunisia	2011
Heidelberger Cement / Caspi Cement LLC (Germany/Kasachstan)	Technical and Market consultancy	Evaluation of various technical solutions to feed an industrial plant with desalinated feed water and producing zero liquid discharge	2011
Dr. Breit GmbH (Germany)	Consulting Services	Conceptual strategic evaluation and design of new desalination products	2011
Confidential Client (Danmark)	Consulting Services	Conceptual strategic evaluation and design of new desalination technologies	2011
Confidential Client (Germany, KSA)	Due Dilligence, KSA	Technical and operational due-diligence of a 30.000 m ³ RO Plant	2011
Saumweber Holding (England/Australia)	Sundrop Farm, Australia	Conceptual Design of a CSP (Concentrated Solar Power) driven desalination system for greenhouses	2011
DME e.V. (Germany)	E-Learning Program in Arabic language	Preparation and realisation of a international e-learning program in desalination.	2011

Client/Location	Project	Services	Year
Pöyry Energy GmbH	Technical Market Information	Preparation and evaluation of a statistic regarding “energy consumption in RO, MF/UF”	2010
Pöyry Energy GmbH	Commercial Market Information	Preparation and evaluation of a statistic regarding “desalination plants worldwide”	2010
BMZ (Federal Ministry for Economic Cooperation and Development) (Germany)	Assessor	Long term cooperation and participation in desalination development in West Asia (Middle East)	2010
DME e.V. (Germany)	E-Learning Program in English	Preparation of learning program. Short introduction of water availability worldwide, general information about use of water, main methods of desalination	2010
Marubeni Corporation Qingdao, China	Supervision and Review consultancy Technical and Financial Pre-Feasibility	Development of a technical and commercial pre-feasibility study of 30.000 m ³ /d in a new desalination option (thermal or membrane) into ongoing industrial processes.	2009
Marubeni Corporation Sur, Oman	Supervision and Review consultancy Investment and O&M Supervision of 70.000 m ³ RO Plant	Supervision of given technical and commercial concepts and review of O&M concept and contracts. Privatisation of an existing desalination plant and integration into a 70.000 m ³ /d new RO plant.	2009
DME e.V. (Germany)	E-Learning Program in German	Short introduction of water availability worldwide, general information about use of water, main methods of desalination. Preparation of learning program.	2009
Confidential Client Turkey	Strategic Consultancy and Business Development	Strategic consultancy and business development for desalination plants in Istanbul (500.000 m ³ /d) and Izmir (350.000 m ³ /d).	2007

Marafiq Independent Water And Power Project Kingdom of Saudi Arabia	Design, heat and water balance review of the thermal and membrane desalination plant	Design of the Desalination Plant (Water Capacity and Cost Aspects)	2005
Yanbu Power and Desalination Plant Kingdom of Saudi Arabia	Pre-feasibility study Implementation of a Power and Desalination Plant in Yanbu Industrial City (YIC) with a capacity of maximum 960 MW Power and 225 MIGD Desalination	Assessment of production capacity, investment cost, and space requirements of desalination alternatives for various co-generation schemes including gas turbine and steam power plants, as well as MSF and RO desalination units, description of typical design and arrangements of MSF and RO desalination plants, assessment of expected environmental impacts of the considered plant configurations	2005
Taweelah, Abu Dhabi, United Arab Emirates	Technical advisory	Evaluation in thermal desalination and evaluation of techniques to be used in process integration	2005
